HÖGEMANN

PIONEERING
AUTOMATION FOR
OVER 30 YEARS

HIGHTECH FROM GARREL.

Anyone interested in automation in the feed and food industry does not turn to Silicon Valley, but rather to the thirty years of Garrel experience.

The name Högemann is synonymous with automation solutions at their best. We offer planning, project management and realisation of complex automation projects including PLC and network technology, control cabinet construction in our own production facility, electrical assembly and installation as well as commissioning worldwide.

Expert advice and planning

The customer's wishes are always paramount. We focus on flexible, expandable and future-proof systems that are individually tailored to your needs. You can rely on the experience and expertise of our technicians and engineers right from the start.

Reliable after-sales service

Even after commissioning, we will not let you and your system down. Our troubleshooting service is there for you around the clock, 365 days a year. A must with after-sales service today.

As we belong to the Big Dutchman Group, you benefit from an efficient network of companies spanning five continents and 100 countries.

Franz Högemann started his own business in 1990 with the production of PLC controllers and control cabinets for concentrated feed mills and continues to set the pace in our development today. Together with Co-Managing Director Michael Hanneken, he leads the way in the development of sophisticated automation solutions. Because there is hardly anything that cannot be improved upon. And if something doesn't exist yet, then you can invent it.

MAXIMUM PRODUCTIVITY AND AUTOMATION.

With our modular falcon® software suite, we set new standards in flexibility and efficiency in process control systems for the feed and food industry. Thanks to our many years of experience, we know your requirements for a modern control system and offer you customised modules for your individual structures and every work step.

Thanks to clear dialogue guidance and simple operation, you can use it to precisely control and continuously monitor all processes. Traceability is possible at any time. Thanks to the software-as-a-service model, you benefit from the completely transparent costs, the arbitrary expansion options as well as regular security updates and further developments. Make the future of the fully integrated process control system a reality now!
