HÖGEMANN

PIONEERING
AUTOMATION
FOR 30 YEARS

JUST WHAT YOU NEED.

The animal feed and food industry works with state-of-the-art production facilities that handle raw materials efficiently and carefully to produce products of the highest quality and grade. It is essential that all processes are precisely controlled, continuously monitored and traceable at all times.

For these special requirements we have developed the modular fhalcon® software suite. Our sophisticated process control system guarantees highly automated production and sets new standards in flexibility and efficiency.

Contact us and make the future of the fully integrated process control system in your company to reality: phone +49 4474 9493-0.

fhalcon® Software Suite

The fhalcon® Software Suite contains more than 30 years of experience and know-how. We simply know what demands you make on a modern control system and offer you tailor-made modules for your individual structures and every step of the process. Thanks to clear dialogue guidance and easy operation you have all processes under control at any time.

The fhalcon® software suite is Windows-based and supports the current operating systems in client/server and virtual structure. The data is stored in SQL databases. Due to the software-as-a-service model you benefit from completely transparent costs, arbitrary extension possibilities as well as regular security updates and further developments.

fhalcon®rom

basics: master data | optimization | round

options: higher right | personal data | plant | declaration | article declaration | automatic declaration | automatic declaration printing | material flow balance | premix | global optimization | fixed recipes | ration | production data | dangerous goods | carbon footprint | language data

fhalcon®dispose

basics: master-data | map | plan | timeline | statistics

options: restriction | telematic app | telematic interface | farm demand | language

fhalcon®truck

basics: master-data | stock management | weigh | track and trace | statistics | archive | export

options: order | transponder self-service | number plate identification | gate management | camera integration | digital signature | digitalize shipping documents | multilingual truck register | mailing | interface | language

fhalcon®analysis

basics: master-data | statistics | export

options: transponder self-service | camera integration | anamenter integration | software interfaces | hardware interfaces | language

fhalcon®import

basics: master-data | stock-management | track and trace | inventory | route | statistics | archive | export

options: order | weigh | finish | raw material demand | transponder self-service | number plate identification | remote displays | gate-management | camera integration | field organisation | digital signature | mailing | black and white | interface | scan | language

fhalcon®production

basics: master-data | stock-management | track and trace | inventory | production planning | dosage control | pressing control | statistics | archive | export

options: order | hand preparation | raw material demand | black and white | scan | diagram | die and roller magement | language

fhalcon®export

basics: master data | stock-management | track and trace | inventory | stistics | archive | export

options: order | plan | bulk loading | handheld loading | bag filling | finish | transponder self-service | number plate identification | remote displays | gate-management | camera integration | field organisation | digital signature | mailing | scan | language

fhalcon®energy

basics: master-data | monitoring | formula | timeline | statistics

options: mailing | export | interface | language

fhalcon®maintenance

basics: master-data | template | service | statistics

options: energy | process | timeline | mailing | language

fhalcon®visualization

basics: route | drive | alarm | failure | production interface | export

options: diagram | scan | language
